

Department seminars in winter semester 2022

Friday 13:15 Room 2/21

	Speaker	Date	Title	Room
1	dr inż. Magdalena Klimek-Chodacka, prof. URK Katedra Biologii Roślin i Biotechnologii Wydział Biotechnologii i Ogrodnictwa Uniwersytet Rolniczy w Krakowie	28.10.2022	Carrot gene editing <i>via</i> CRISPR	2/21
2	Dr Mateusz Matuszkiewicz KGHiBR	4.11.2022	Adult Plant Resistance to Brown Rust in cereals.	2/21
3	Dr William Truman Institute of Plant Genetics of the Polish Academy of Sciences, Poznań	18.11.2022	Screening natural variation in Arabidopsis to find genes involved in resistance, susceptibility and tolerance to clubroot disease	2/21
4	Dr Wenping Liu Europejskie Centrum Sekwencjonowania w Warszawie	25.11.2022	tba	2/21
5	Dr Marcin Olszak Instytut Biochemii i Biofizyki PAN, Warszawa	2.12.2022	Selective autophagy in plants	2/21
6	Dr Marek D. Koter KGHiBR	9.12.2022	Host proteom in response to a pathogen infection: tomato root versus Plant Cyst Nematode	2/21
7	Prof. Piotr Ziótkowski Instytut Biologii Molekularnej i Biotechnologii, Poznań	16.12.2022	Histone variant for good times and bad times: unexpected role of H2A.Z in metabolic switch	2/21
8	Dr Muhammad Imran KGHiBR	13.01.2023	tba	2/21
9	Dr David Rodriguez KGHiBR	20.01.2023	Genetic control of phosphorus uptake and tolerance to phosphorus deficiency in plants	2/21
10	Dr inż. Maciej Bernacki KGHiBR	27.01.2023	A mortal family, plant metacaspase family and its role in cell death regulation	2/21
