

# Department seminars in winter semester 2023

Friday 14:15 Room 2/21 or MS Teams

	Speaker	Date	Title	Room
1	Dr Steven Dreissig	October 20th (on-site)	Intraspecific variation of pollen and anther morphology in a wind-pollinated grass species ( <i>S. cereale</i> )	2/21
2	Dr Marian Schubert	November 10th	Molecular evolution of (short day) vernalization in temperate grasses	MS Teams
3	Dr Piotr Gawroński	November 17th	Rules for decoding genetic information in chloroplasts	2/21
4	Prof. Zofia Szweykowska-Kulińska	November 24th	MicroRNA and its target modules involved in reproduction success in <i>Marchantia polymorpha</i>	Lecture hall 1
5	Dr Magdalena Cieplak	December 1st	Virulence analysis and characterization of <i>Blumeria graminis f.sp avenae</i> population in Poland in the years 2014-2020	2/21
6	Dr Małgorzata Lichočka  Institute of Biochemistry and Biophysics PAS, Warsaw, Poland	December 8st	Functional analysis of annexin 5 (ANN5) during pollen development and in response to the environmental stress	2/21
7	Dr Agnieszka Skarzyńska <b>cancelled</b>	December 15st	Chloroplast genome – what is already known and what is still to be discovered	<b>cancelled</b>
8	Dr Peter Kindgren	January 12th	Making sense of the antisense enigma in plants	MS Teams
9	Dr Sirine Werghi	January 19th	Bacterial Allies : Mitigating TSWV Impact on Tomato Plants through Growth Promotion	2/21
